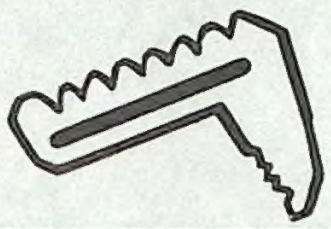
America's Greatest triumph in tools!
Simple as A B C.
So versatile it's a pocket workshop.

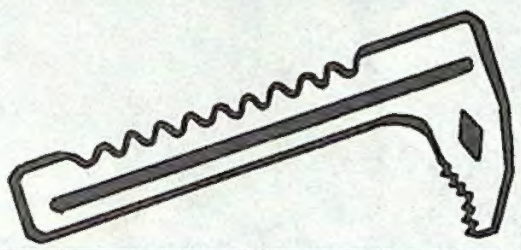
- The perfect PARALLEL JAWS give firm grip on round or square sides and edges. Replaces pliers, pipe, box, open end and socket wrenches. Powerful yet so delicate it will not damage highly polished fittings, nuts or bolts, SAE, USS, or METRIC.
- Plastic covered handles provide firm, comfortable gripping power.
- Forged top quality tool steel.
- All parts HI-DRIZE heat treated and precision built.

STANDARD KIT HAS THESE INTERCHANGEABLE JAWS



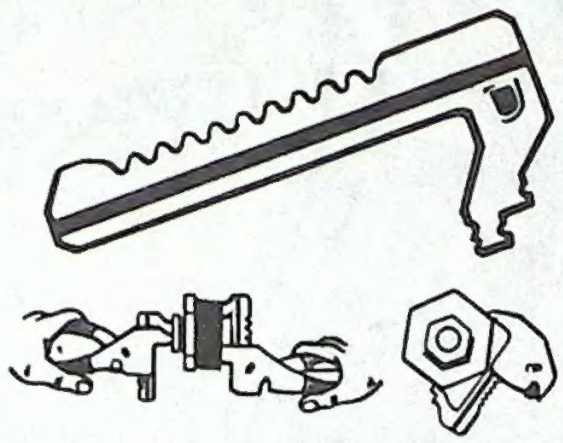
REGULAR PIPE JAW

Perfect for working with pipe from ¼" to 1" or bolts and nuts from 0" to 1¼", as well as many other uses. Will not damage threads.



GIANT PIPE JAW

Firmly grips pipe up to 1½" O.D. without thread damage. Because of the 10 to 1 gripping power of Plierench, the Giant Pipe Jaw outperforms ordinary wrenches with ease.



GIANT INTERNAL-EXTERNAL JAW

Grips tubes, pipes, or fittings from the inside where no outside area is exposed. Internal grip from ½" to 2". External from ¾" to 1½" round or from ¾" up to 2" square. This marvelous jaw fits Plierench from the inside, as well as the outside. (See illustration.) Also replaces easy-outs and any type of spud wrench. No other tool can make this statement.

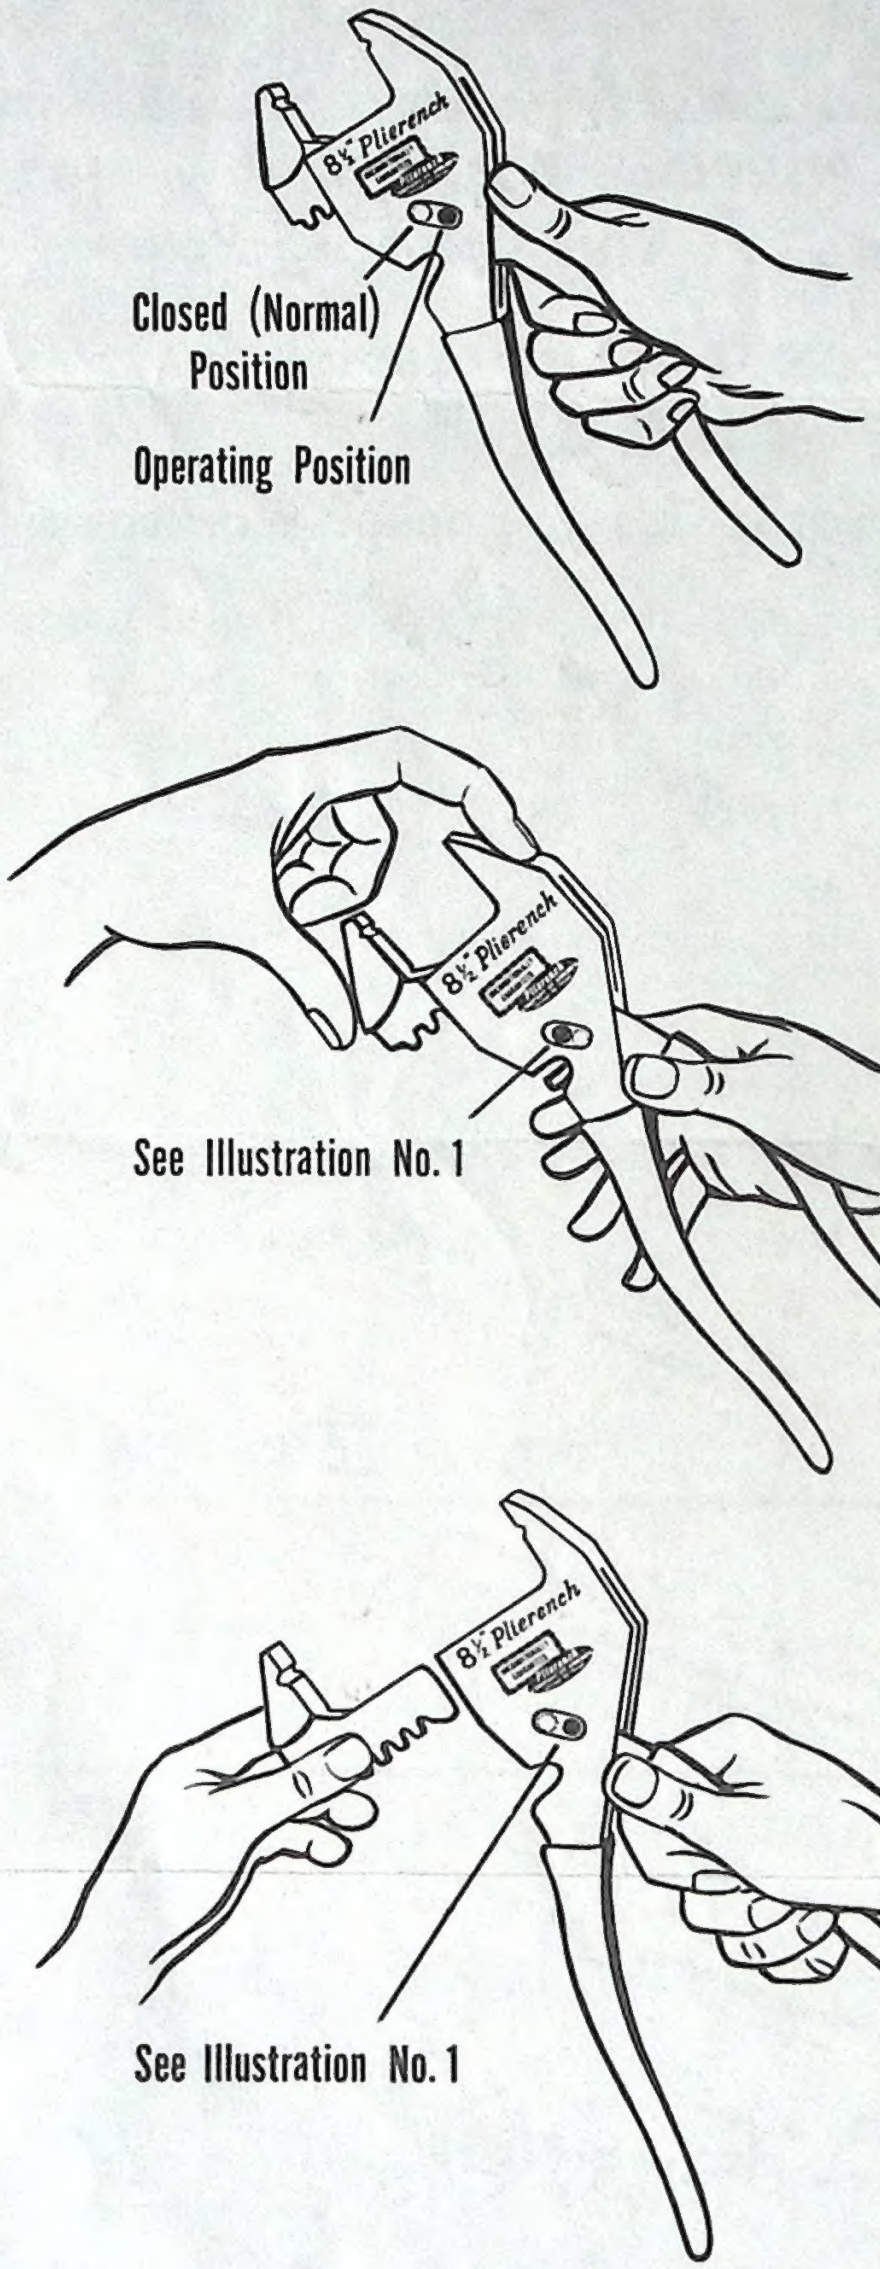
HOW TO USE *Plierench* WITH EASE



1. To OPEN jaws, simply grasp the gear handle in one hand, "AS PICTURED" (Tilt slightly forward), and with thumb on back PUSH the frame.

2. To FIT parallel jaws to ANY SIZE, hold the handles loosely in one hand and PRESS the jaws together with other hand. (see illustration)

3. To CHANGE jaws, hold tool in hand as shown, PRESS thumb against back of frame as pictured, and REMOVE or REPLACE jaws as desired.
